Motion by Campbell second by Corrion to approve the March 27, 2026 minutes. All ayes, **motion carried.**

Reports: Hartz reported that this summer the water discoloration has improved but we are still experiencing hardness. He is working with engineers in a pilot study and will meet with EGLE in the next few weeks to go over it. Hartz explained that while testing for lead and copper in the township, they did find that there were a couple that had elevated copper levels. This could be because of lower PH levels. Hartz said the water plant will continue to treat the manganese throughout the fall.

Financial Statements: Learman discussed the budget and water rate.

Motion made by Campbell second by Hill to approve the financial statements. All ayes, **motion carried.**
